The Network of Automotive Excellence

The Network of Automotive Excellence (NoAE) is a free and open initiative for the automobile, aeronautic, transportation and supplier industry. It works as a professional network with the objective to intensify strategic, organisational and technological exchange of ideas and experiences between the companies participating. Since 2006 NoAE has arranged the international Project Day and in 2012 more than 300 visitors from more than 21 countries participated. The primary focus of the day has all time been **“From ideas and innovations to international cooperation and projects”** and this is also the case in 2013 where focus will be on E-Mobility and how this can create growth in the sector for electric transportation.

The NoAE CSC

The main purpose of the NoAE CSC is to create and drive projects in order to create growth and innovation in the automotive, aeronautic and transportation industry. The organization is a cross-European organization with representatives of a wide array of competences from experienced project managers and development experts.

The NoAE CSC is an addition to the Project Day and will work to create the right drive in projects and multidisciplinary involvement of the right competences in order to create the best possible solution. This will be the next step **“From cooperation and projects to growth and economic success.”**

Your project idea...

... can participate at the Project Day E-mobility. Your contacts support you with framework rules.

3 workshops – 1 goal

The workshops in the project day will each have their goal and theme but the overall goal is the same and so is the red thread between them – creation of international cooperation and projects.

E-mobility industry collaboration

- Meet the upcoming OEMs working with state of the art electric vehicles
- Collaborate on solutions to the major challenges the industry is facing –suppliers and producers
- Discover new approaches to supplier sales and development

NoAE Green Cities

- Learn about the latest trends on mobility in cities by the greenest European cities
- See how ICT play an important role in the future of mobility
- Hear about the effect of infrastructure development – is it the hen or egg?

Cross Border Collaboration

- Meet participants from countries such as Denmark, Belgium, The Netherlands, Spain, Italy and NRW/Germany
- Hear the project proposals from the participating countries
- Get your change to be a part of a cross border collaboration

Europe meets Aachen and

International Meeting Point for Projects

Innovative Mobility Projects and Developments from our European Partners will be presented in the exhibition. Project ideas developed during the day will be collected at the Meeting Point to transfer them into powerful projects.
