Established in 1993, MOVIPLAST SRL soon became one of the leading Romanian producers of polyethylene-based packaging products.

This ascension was based on a permanent concern to improve technology and on the high quality of our products. We have had the certificate ISO 9001:2001 since 1997 and in 2003 our company earned the certificate ISO 14001:2004. In 2005, Moviplast SRL was certified according to OHSAS 18001:2004. The supervision organism for these certifications is SRAC ([see chapter Quality](#)).

The wide range of the products placed on the market (film, packaging, shopping bags, trash bags printed or not printed), made of low density polyethylene and high density polyethylene as well as the fact that most of our 100 employees work in shifts covering the 24 hours of the day, seven days a week, have made it possible for Moviplast to process annually over 2000 tons of polyethylene, of which at the moment, 30-40% represents the production meant for export in the European Union.

Legally, MOVIPLAST is a shareholding company with an entirely private Romanian capital.

The satisfaction of clients demands, by delivering quality products, as well as the protection of the environment are basically a part of the production process at Moviplast SRL

Regarding the quality of our products, we exchange feedbacks with both our raw material suppliers and the beneficiaries of our products.

Moviplast earned the quality system certification according to the standard ISO 9001 in 1997, at the moment being strictly supervised by SRAC - Thüringen from Germany.

The care and respect for the environment were proved by the certification of the Environmental Management System ISO 14001 earned in 2003 under the strict supervision of the German organisation Germanischer Lloyd, certification maintained today under the strict supervision of SRAC.

Under the supervision of AEROQ Bucharest, in March 2005, Moviplast SRL Craiova got the certification of the Occupational Health and Safety Management System according to the standard OHSAS 18001 : 1999, maintained today under the strict supervision of SRAC.

At the export, you will find the products made by Moviplast SRL on the markets from Germany, Italy, Belgium, Austria, Swiss and Republic of Moldavia.
