

RESEARCH

CardioMed has participated in numerous research initiatives in the pursuit of continuous and permanent progress and development in treatment and diagnostic methods. As a result and as proof of our commitment and excellence in research we have won multiple projects funded through European grants and have participated in over twenty international clinical trials.

CardioMed's new building and headquarters is the result of a recent research project in cardiology.

EQUIPMENT

Ultrasound Systems

Our newest acquisitions include the highest performing ultrasound systems from the two market leaders in ultrasound machines: Philips EPIQ7 and GE E9.

ECG Monitors

ECG Monitoring, using portable devices from Mortara and GE, consists in recording the electrical activity of the heart for 24-48 hr and is useful in detecting potential heart rhythm and conduction irregularities as well as myocardial ischemia.

Telemetry System

To ensure the safety and optimal care of our patients, we offer the possibility of continuous monitoring for patients admitted in our outpatient facility as well as those participating in our cardiovascular rehabilitation program.

Cardiopulmonary Stress Testing and Tilt Testing

The tilt test is an investigation indispensable in determining syncope etiology. Cardiopulmonary stress testing is essential in the evaluation of the functional capacity of patients ranging from those suffering from cardiac disease to professional athletes.

Laboratory

The laboratory covers a wide range of tests and investigation under quality assessment program in order to ensure a high accuracy.

YOUR HEALTH IS OUR CONCERN

ABOUT US

CardioMed is a medical center focused on meeting and responding efficiently to patients' needs and conditions through a wide array of medical services provided by a team formed of highly qualified medical professionals.

SERVICES

Besides basic medical investigations, CardioMed offers a series of specialized medical services:

- ❖ BP and 24 hr/48 hr ECG monitoring
- ❖ Adult and pediatric echocardiography
- ❖ Stress test echocardiography
- ❖ Transesophageal echocardiography

- ❖ Vascular Doppler ultrasound
- ❖ Abdominal echography
 - ❖ Cardiac stress testing
- ❖ Cardiopulmonary stress testing
- ❖ Tilt testing
- ❖ Spirometry
- ❖ Medical rehabilitation:
 - Cardiovascular
 - Neurological
 - Orthopedic
 - Kinetotherapy
 - Physiotherapy

THE CARDIOMED LABORATORY

The medical laboratory represents a vital component within the medical process. Because we concentrate on quality we use highly performing equipment to ensure that results are accurate and timely. We have the privilege to work with an exceptionally professional laboratory team, led by Dr. Cornelia Netoiu.

“Excellence is the result of the passion and the dedication which drives the laboratory team every day.”

The CardioMed laboratory executes monthly external quality controls through internationally recognised and accredited external quality evaluation firms to guarantee the accurateness of laboratory results.

Our laboratory covers an extensive range of investigations within the following specialties:

- ❖ Hematology
 - ❖ Biochemistry (clinical biochemistry and urinalysis)
 - ❖ Immunology (hormones and tumor markers)
 - ❖ Bacteriology
 - ❖ Hematological cytology
 - ❖ Coagulation
 - ❖ Ionogram and gasometric testing
- Our lab is RENAR accredited with standard of quality SR EN 15189:2013*

Dr. Constantin Militaru

“From its very foundation in 1998, CardioMed has followed two fundamental principles: (1) forming a team of specialists with the highest professional and moral qualifications and (2) a continuous preoccupation for the patient’s wellbeing.”

OUR SPECIALTIES

- ❖ Cardiology
- ❖ Internal Medicine
- ❖ Neurology
- ❖ Pneumology
- ❖ Endocrinology
- ❖ Diabetes and Nutrition
- ❖ Medical Rehabilitation
- ❖ Medical Laboratory

Our clinic is accredited with standard of quality SR EN ISO 9001:2008
