

IT Six Global Services

Software development & IT outsourcing

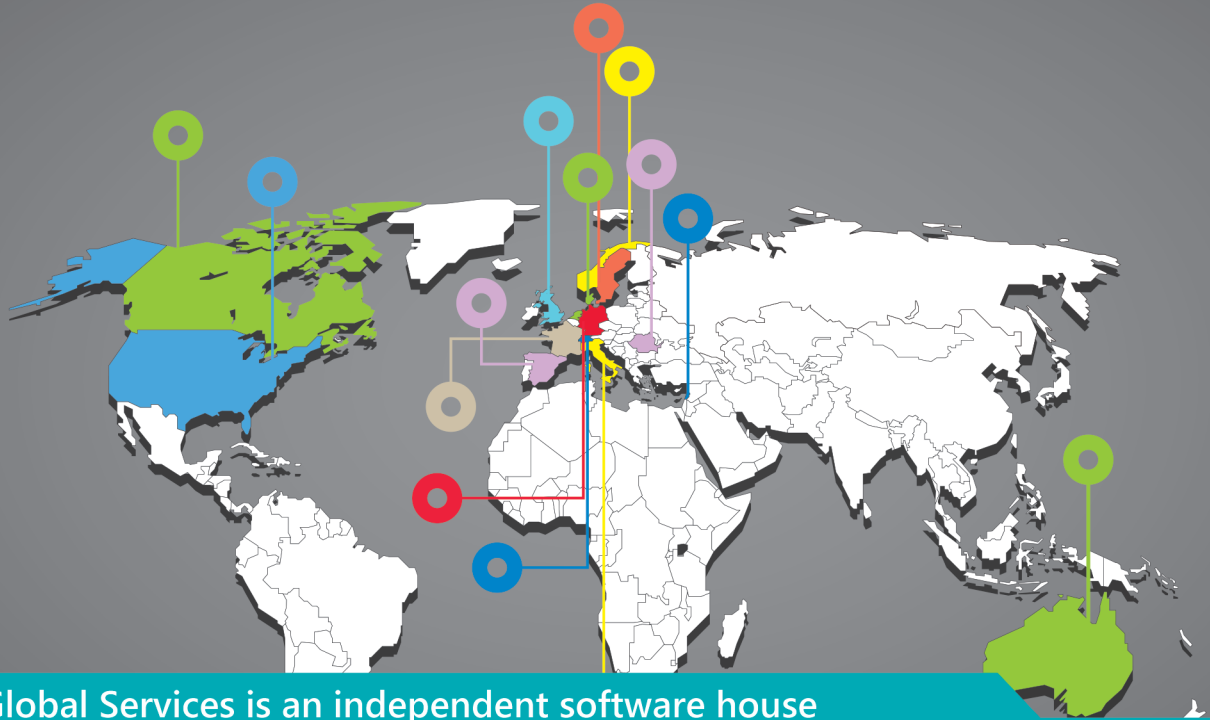

When it comes to software engineering we are experts in building and leading teams of professionals that will help you achieve your dreams.

Outsource smart.

Performance is achieved by using the right people in the right places.
We help your business grow.

IT Six Global Services

IT Six Global Services is an independent software house headquartered in Craiova, Romania – Eastern Europe and still owned by the founders.

Company Profile

IT Six Global Services is a technology and outsourcing company committed to deliver innovation through software services.

We offer custom software development services to our worldwide partners, both offshore and at client's site. IT Six brings highly qualified software engineers on board to ensure a work culture that fosters personal growth through mentorship.

When it comes to software engineering we are experts in building and leading teams of professionals that will help you achieve your dreams. We are strongly positioned in the IT outsourcing market, where clients enjoy the cost savings.

IT Six Global Services is headquartered in Craiova, South West of Romania. Craiova is the 6th largest city in the country, having 270,000 inhabitants. It is located roughly 250 km away from Bucharest, the capital, both by train and highway. Being an industrial and University city, as well as an IT hub, Craiova has a strong infrastructure including an international airport, with direct flights to the UK, Germany, Italy and Spain.

MISSION

To provide companies across industries with innovative software solutions using emerging technologies at an affordable cost.

VISION

IT Six will be one of the best known and most respected software services companies in Eastern Europe.

MAIN DEVELOPMENT TECHNOLOGIES:

AGILE PRACTICE

Our preferred approach for software Application Development is Planned SCRUM - a project management methodology based on Agile iterative process. Our methodology contains also non standard elements, which enable our clients to control the project better and to assess potential risks.

IT Six Global Services provides you with expertise and proactive staff at all levels: from use case modeling, process modeling, UI/UX modeling, business and technical requirements, to data modeling, architecture, dynamic design, structural design and standard-based coding.

We have been practicing SCRUM intensively since 2007. Our project leaders hold international certifications such as Certified Scrum Master, Certified Product Owner, Agile Certified Professional and PMI ACP.

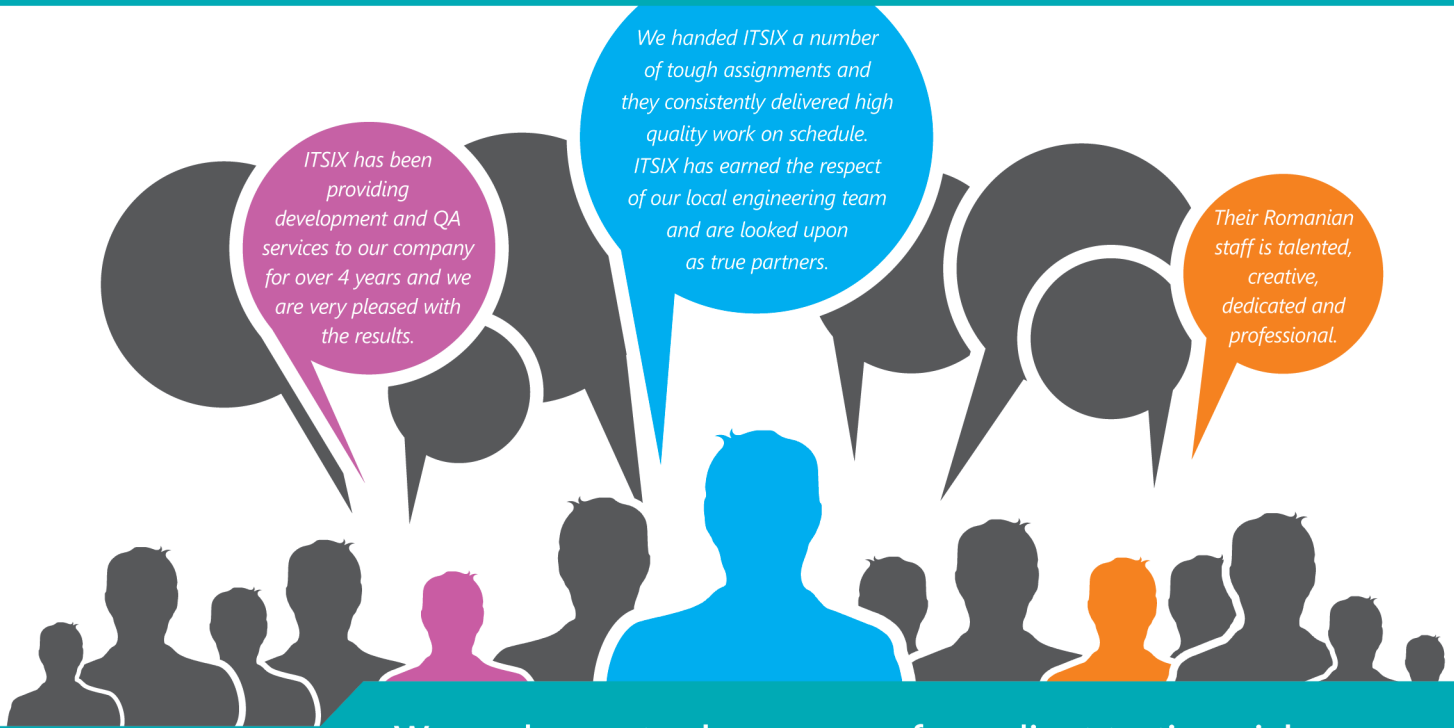

Engagement process

Business models

Time & Materials SHORT-TERM	Time & Materials LONG-TERM	FIXED PRICE SHORT-TERM	FIXED PRICED LONG-TERM
STAFFING	DEDICATED TEAM	PILOT	MILESTONE BASED
<ul style="list-style-type: none"> - Temporary work - Interviews (yes) - Low risk, client's PM - Higher hourly cost - Fixed hourly rate per person - Invoicing based on timesheet 	<ul style="list-style-type: none"> - Full time, managed services - Ideal for AGILE - PM shared between client and vendor - Interviews (yes) - Low risk, low cost - Team stability, financial predictability - Fixed monthly fee per person 	<ul style="list-style-type: none"> - Fixed price, fixed requirements - Usually "waterfall" - Client's BA & IT Six PM work together - No interviews, all risk on the vendor - Longer time to start, paperwork overhead - Invoicing on delivery 	<ul style="list-style-type: none"> - A combination of Agile and Fixed Price - Planning a few sprints ahead, then freeze requirements - Customer's Product Owner & IT Six Scrum Master work together - Longer time to start, paperwork overhead - Invoicing based on accepted sprints

Testimonials

We are happy to share some of our client testimonials.

Our clients join us in confidence, knowing we have the resources to keep supporting their projects as a long-term development partner.

There is always a danger when working with a partner that neither the quality nor the cost effectiveness expected is achieved. With ITSix, this is absolutely not the case. The quality of the finished products & services as well as the cost regime under which they were delivered meant we broadened our use of ITSix; and continue to do so. ITSix helped us build better, more customer focused web services at a fraction of the cost we could have done so internally. Their attention to detail, meant that our IT department is getting a reputation for building great services. We estimate that we have saved over 55% of the cost of running the same team internally, yet productivity has increased by 30% at the same time.

Paul W., Head of Group IM, Leading Global Manufacturing Company, UK

Thanks to the powerful dedicated team from IT Six we were able to set up a great and solid agile team for a huge ongoing project. Communication and product quality is outstanding and we're very thankful for having that 'same wavelength'-partner by our side!

Tobias G., Owner, IT Consulting company, Germany

I have experienced the cooperation with ITSix as very professional, properly and positive! The developers have a very high level of technical expertise and they have a work ethic that is extremely good and which certainly matches what we are used to in Scandinavia. The team is an integrated part of our development team and work independently and creatively in developing our product portfolio.

Christian E., CEO, Mobile software firm, Norway

The quality of the ITSix team is first rate. The depth of knowledge and experience means we can rely on ITSix to help us deliver on our commitments. Tight control through effective project management has helped us immensely.

Head of Sales Operations, global Diamond Company

BENEFITS OF OUTSOURCING

Innovation that cannot be achieved by average IT units
