Technology Transfer and Innovation

Events in technology transfer and innovation field

Enterprise Europe Network carries out a variety of events to promote their activities to companies and organisations at regional, national or European level. The events provide you the opportunity to meet potential cooperation partners during pre-arranged face-to-face meetings, to present your business or technology offers.

Do you have technology profiles in the fields? Please contact office@ipacv.ro to support you.

B2B & Brokerage event during the Forum for Innovation & Research Fair, Bucharest, Romania, 18-19 Oct. 2012

With the occasion of the International Technical Fair TIB 2012 and the Research Salon, AROTT – Romanian Association for Technology Transfer and Innovation and Enterprise Europe Network – Romania have the pleasure in inviting you to take part, in a **Business Meetings and Brokerage Event** as well as the **Innovation Forum**.

The event represent the main place to discuss, analyse the synergies, strategies, ideas on innovation, technology transfer, entrepreneunerial formation, research, in benefit of the market. The event will take place in parallel with:

- the Research Fair www.mct.ro ,
- INVENTIKA - International Fair for Inventions www.expoinventika.ro

- TIB - Bucharest International Technical Fair <http://www.tib.ro/>
- Brokerage event <http://www.enterprise-europe-network.ec.europa.eu/public/calendar/viewdetails.cfm?EventID=2249&type=future>
- The Innovation Forum

We kindly invite you and your clients to participate, specially if you have:

- Business offers or requests (for the sought partners)
- Offers of new technologies, inventions, innovations, that you wish to promote through technology transfer or require offers of new technologies, equipments to be promoted in Romania.
- Offers or requests for partnerships for the participation in European projects (FP7, CIP, Eureka, etc)

Whether you're interested in the latest trends in innovation, technology transfer, new technologies in the field, **technologies for maximizing SMEs competitiveness**, a trip to the **event** would really pay dividends. The event functions as an interface between research, innovation and the market sector allowing new technologies, processes, patents and licenses to be offered.

You will have the opportunity to get to know selected partners during individual discussions, which aim to pave the way for future co-operations. During this Forum, industry leaders, local authorities and scientists will be strongly encouraged to share their expectations, exchanging knowledge understand the specific characteristics of innovation systems, and discover the best practices and innovations to be capitalised on as part of an original partnership-based approach.

4th World Famous Mountains Conference, 25-28 September 2012, Olanesti, Valcea, Romania

Thanks to the generous support of the Montana Association, the World Famous Mountains Association brought their fourth annual conference to Romania for the first time. The first three conferences, held two in China and one in the USA, attracted over 300 attendees. Our main purposes are:

- To establish partnerships with similar organizations in Europe;
- To promote the concept of sustainable development in rural & urban areas;
- To support the investments for a modern infrastructure;
- To use the mountain resources to help SME to develop.

EBTC Biotechnology Mission 2012, in two parts

The European Business & Technology Centre-EBTC invite you to participate in an two-part biotechnology mission. With a focus on various biotech subsectors, emerging trends, challenges, policy frameworks, the mission aims to showcase interesting, relevant, ready-to-go opportunities in the biotechnology sector in India, encourage EU-India collaboration.

Part 1 – 'EBTC Biotechnology Virtual Matchmaking' (24th – 28th September 2012)

Register online at <http://www.b2match.com/biotechfm2012>, meet virtually with Indian counterparts. The virtual match-making will allow you to explore potential private/public opportunities without the need to invest major financial resources for first contacts. You will also have access to view full Indian biotech project briefs, enabling you to virtually interact with Indian counterparts to explore possible collaborations; joint ventures; technology development / transfer, clinical trials covering research organizations, industries/public/private funding organizations – all in a virtual set up.

Part 2 – 'EBTC Business & Research Delegation to India' (5th – 9th November 2012, Bengaluru)

With time to develop relationships, advance agreements virtually will allow you to meet your prospective Indian counterparts in person, will be the perfect occasion to cement relationships. This event is open to any EU organization / individual interested in exploring the best Indian opportunities in the biotech sector. Be it a small medium sized enterprise (SME's) or research institution, the event ensures a mix of interesting professionals from both the EU & India.

More... Register online: www.b2match.com/biotechfm2012 ; Event: www.ebtc.eu/events.html ; [Event Information Sheet](#)

EBTC Energy Flagship Mission 2012, 7-9 November 2012, New Delhi, India

The mission aims to showcase relevant, ready-to-go opportunities in the energy sector, encourage collaboration, with a focus on various emerging trends, challenges, policy frameworks. This event is open to EU organization/individual, SME, research institutions interested in exploring the best Indian opportunities in the clean energy sector. **Mission Benefits:**

- Attend the 6th Renewable Energy India 2012 Expo & Conference.
- Showcase European research, technology and solutions.
- Get an overview of Indian private and public sectors renewable energy project opportunities.
- Opportunity to gain insight into various financing sources.
- Participate in high-level networking and information sessions.
- A customized schedule of one-on-one business meetings with pre-screened Indian potential partners.
- Pre-registered company/industry site visits.
- Empower yourself with adequate knowledge about doing business in the Indian renewable sector.

The delegation will enable you to gain an understanding of the Indian energy market, explore business opportunities. The event will include a multitude of activities including high-end workshops; B2B / B2G meetings, site visits, networking sessions. It is the objective of the EBTC business, research delegation to assist EU companies, researchers in their venture to India, identify needs within India, facilitate the transfer of clean energy technology to the Indian market.

Europe INNOVA Conference, Stress Test of EU Innovation Policy, 23-24 October 2012, Copenhagen, Denmark

Europe INNOVA 2012 will stress test innovation policy in three areas:

- SME innovation support schemes
- Commercial exploitation of knowledge, IP and new inventions
- Networks and cluster policies

Europe INNOVA 2012 will provide you with:

- The latest knowledge and the hottest discussions going on in the innovation policy society
- New knowledge on how you can improve your performance as policy maker and programme owner
- New knowledge on the best innovation policies as well as the most embarrassing failures you should avoid
- Access to likeminded people who can support you as policy maker and programme owner
- New ideas and new energy to meet the challenges of the future

The conference is based on a completely new innovative concept: **“Ten Dogma Rules For Conferences”**

1. **No opening speeches from VIPs**
2. **No time wasted on long presentation of speakers**
3. **No keynote speakers**, but we can offer you access to brand new knowledge on innovation policy
4. **No PowerPoint presentations**, the speakers will be interviewed on stage by a professional moderator
5. **No reports will be presented**, you will get access to reports before the conference.
6. **No parallel sessions** – you will get access to all the wisdom of the conference.
7. **No quotations** – participants should contribute with their own thinking, own ideas and original thoughts
8. **No best practice without a critical angle** – all cases presented will be submitted to a stress test
9. **No one is allowed to be bored** – minimum one good laugh per hour
10. **Lots of breaks** – you will get the best opportunities to make contacts, dating and networking

Clusters in emerging industries

From a policymaker's point of view, emerging industries, independent of how they are defined, are highly important. They yield the highest potential for the growth and competitiveness of firms, especially SMEs. The key question is: how can emerging industries' firms participation in clusters be supported? How can clusters contribute? How shall clusters adopt policies and support measures? Is there any need for new approaches? Answers to these and other questions can be found at a working paper by the Institute for Innovation and Technology.

More... <http://www.tci-network.org/news/card/478>

Clusters new trends & smart specialization

Over 75 European policy makers gathered in Brussels to review the linkages and synergies between clusters, the new regional policy framework known as RIS3 (Research & Innovation Strategies for Smart Specialisation). From a policymaker's point of view, emerging industries, independent of how they are defined, are highly important. They yield the highest potential for the growth, competitiveness of firms, especially SMEs. The key question is: how can emerging industries' firms participation in clusters be supported? How can clusters contribute? How shall clusters adopt policies/support measures? Is there any need for new approaches? Answers to the questions can be found at a working paper by the Institute for Innovation & Technology.

Focusing in on European research in central and eastern Europe

European research, technology and development has long been at the forefront of many breakthroughs but, according to the European Science Foundation, a rethink needs to occur to identify the challenges of the future and new agendas being developed. In addition to this, attention is needed on how these pan-European research agendas can blend with the specific dynamics of change occurring in various regions, and in particular, central and eastern Europe.

Innovation and Entrepreneurship

Commission launches innovation partnership for Smart Cities and Communities

The initiative is dedicated to demonstrating commercial-scale solutions in a small number of locations, thus supporting European cities and communities to meet their commitments in, for example, the fields of energy, transport, air quality or climate change mitigation. The 1st phase is the orientation of the 2013 FP7 to reflect the integrated nature of the urban energy, transport, ICT topics. In this Work Programme, topics related to SCC have been united in a call that maximises the impact of projects at the interface of the 3 sectors.

Lighthouse projects will tackle issues at the intersection of the transport, energy and ICT sectors. The projects should trigger strategic partnerships of innovation-driven companies from the three sectors acting across geographical borders. They should forge strong partnerships with local leaders and municipal authorities to gain the vital support and visibility necessary to engage and empower citizens and local stakeholders to reduce greenhouse gas emissions and energy consumption and more widely to improve the urban environment. Throughout the SCC, cities will be given the opportunity to highlight to potential consortia their project plans, key areas of interest and longer-term ambitions.

Horizontal Actions for collaboration on key challenges. The Commission will support selected horizontal activities to address specific challenges, foster cross-project collaboration and promote common approaches (see figure 2). This will include Working Groups within the Stakeholder Platform (see chapter 4.2) and also specific actions to disseminate results to stakeholders. Moreover options for EU policy initiatives, future regulation and standardisation facilitating commercial roll-out will be collected. This will necessitate the use of performance data and other information from the lighthouse projects including use of common standards and metrics to measure environmental and other relevant impacts, common practices for data collection and integration, financing and citizen empowerment and engagement.

The governance structure of the SCC will be composed of two entities: the High Level Group, the Stakeholder Platform.

Regional Innovation Reports

Regional innovation reports provide a description and analysis of contemporary developments on regional innovation policy. For a selected number of regions, the regional innovation reports take into account the specific context and general trends to highlight innovation policy trends and priorities.

Breakthrough Solutions through Global Best Practices

Innovation is the key to sustained growth and profitability. Smart business leaders know this, but how many managers actually achieve breakthrough results through innovation? Using new methods & tools, clients regularly achieve quantum improvements in key business metrics. We bring the best practices of the world's leading innovators to you, so you can apply them to challenges in every area of the enterprise. Do you, your company have what it takes to innovate for success? We are certain that you do. Let us prove it to you, then, let us show you how.

Unleashing the huge potential of key enabling technologies for jobs

The EC has called for a European effort to boost Key Enabling Technologies (KETs). The global market in KETs, which comprises micro- and nanoelectronics, advanced materials, industrial biotechnology, photonics, nanotechnology and advanced manufacturing systems, is forecast to grow from € 646 Billion to over € 1 Trillion by 2015. This is a jump of over 54%, or more than 8% of the EU's GDP. Rapid growth in jobs is expected, too. In nanotechnology industries alone, the number of jobs in the EU is expected to increase from 160,000 in 2008, to around 400,000 by 2015.

6 Steps to Franchising Your Business

Franchising your small business may be a good way to grow fast. Figuring out whether or not franchising will work for you is a matter of knowing your business and yourself. From drawing up a Financial Disclosure Document to figuring out what potted plants will line the storefront, when turning a business into a franchise the devil is in the details. The pay off, however, can be lucrative, as franchising is one of the best ways to spread a brand and grow a business quickly.

Navigating the Three Horizon Framework

The [Three Horizon Approach](#) is a more than valuable one for you to begin to build the necessary structure into your thinking about its evolutionary place bridging strategy, innovation. This framework helps your thinking to construct the different activities into their appropriate space for deciding what resources to commit to them.

By breaking these up into their different needs you begin to break down the 'debate' on what and where to place your emphasis, resources and thinking in clearer time frames of attainment. The discussions become far more 'framed', allow for a clarity, can often defuse needless debates/fuel more 'mature' ones.

[More... Navigating-the-three-horizon-framework](#)

How would you manage innovation in org that thrives on operational excellence/continuous improvement?

Continuous improvement is innovation, incremental innovation. A large mass of managers, employees working on incremental improvements is a powerful force, creates a capability, difficult for rivals to copy (witness Toyota with Lean).

A clear vision/strategy for the firm's overall improvement needs will help identify where 'step change' improvement is needed as opposed to incremental. Strategic organizations pay attention to the emerging changes in the market place. Truly "excellent" organizations also identify disruptive solutions to as yet unrevealed future demands.

As an organization that thrives on operational excellence, do you have a robust strategic planning process excellence to ensure your performance well into the future? This is an essential guiding element of an overall innovation effort, must be distinct – but connected – efforts. Then the company's strategic vision must be clear, well communicated, embraced throughout the organization as fundamental to business decisions, and (very important) incentivized appropriately.

Lean initiatives primarily support ongoing efficiency (aka incremental). Where incremental innovation efforts reside within core processes throughout the enterprise/disruptive innovation development benefits from a separate strategically focused "laboratory" environment that incorporates diverse inputs. Concurrently with their continuous production efficiency activities, Toyota's innovative hybrid program was developing a disruptive offering aligned with their green strategy. This wasn't an incremental innovation or a waste elimination effort.

Harvard Business Review, May 2012, has a great article, "Managing Your Innovation Portfolio", that prescribes a holistic perspective for an organization's innovation. It recommends an active, centralized management of innovation as opposed to allowing disparate innovation initiatives throughout the company. The thinking describes the mix of core, incremental, transformational innovations both in terms of investment and returns.

Partner Search

NMP Partner Search Facility

With the publication of the NMP Work Programme 2013 on July 10th, 2012, the Partner Search Facility provided by the NMP Team (network of national contact points for the NMP programme) has been updated.

An important pre-requisite for a promising project proposal is a suitable consortium of project applicants. Usually, a project consortium must have a minimum of 3 partners from 3 EU countries; more details concerning such rules, regulations may be found in the respective call files, in the document "[EC rules for participation](#)".

When building a project consortium the expertise of the project partners should complement each other, ideally, the prospective partners should already be in close contact or collaboration.

The Search Facility has been established by the network on NMP NCPs in order to offer best support to its clients. The web service is strictly focused on the open calls for proposals of theme 4 – NMP/FP7. We discern between:

- **Partner Offers** - Researchers who offer their research expertise, who are looking for collaboration in project consortia

• **Partner Offers** - Researchers or consortia with a definite idea for a project who are looking for further partners to complement the expertise scope of the consortium

Partner Search from Romania

SANDI Project: "Support Actions to create New RDI partnerships in trans-border area in order to bring together Business and Research for accessing European Funds"

SANDI project is looking for experts in the field of innovation, research, technology transfer from Romania and Bulgaria (or Europe) to be part of our Cross Border Cooperation Network of specialists from all technological fields. CBC Partners means partnerships in Romania - Bulgaria Cross Border Area for a sustainable development. The project and the network will benefit of an interactive website dedicated to the local needs.

We intend to improve the support in cross-border cooperation, to promote the research results and to improve the local image in order to attract new Regional & European funds, to develop research & economic partnerships agreements between network partners, to submit projects proposals. The project aims to identify the local needs, to correlate them with specific partners of the network. More information: <http://www.cbc-partners.ro>

Looking for partners for the FP7 2013 - ENV.2013.6.5-2 Mobilizing environmental knowledge for policy & society

The art of music in the European dialogue. Similarities and differences between the classical art and musicology in Eastern European countries (Romania, Hungary) and Northern countries (Norway, Denmark, Sweden). Research wishes to distinguish the common landmarks but also the different approaches to the role of classical music in two geographically distinct regions but which have many common elements in common. Although the research area is a rich one we wish to decant the things that unite us, to learn from each other ways of approaching the analysis of classical interpretive and vocal art, the art of musicology and their management. As a small start-up we are looking to join research groups that are preparing to submit a proposal for the call but we are more interested in [ENV.2013.6.4-1 Assessing individual exposure to environmental stressors and predicting health outcomes](#). There are any parties that are interested in that?

Looking for partners for the FP7 2013 - ENV.2013.6.5-2 Mobilizing environmental knowledge for policy & society

Organist European art. A cultural dialogue between Romanian and Spanish contemporary organistic creation.

The research proposes to build a connection bridge between these 2 cultures, in a conference dedicated to organ building, performing art and organ musical pedagogy. We are starting from two existing databases concerning the status of the organs in the two countries, but especially concerning the Romanian experience in composition of the www.monografia-orgilor.uvt.ro page. In the performing arts domain we propose to realise two stages of master courses.

We also propose to organise, as a part of two national festivals, „Timorgelfest" in Romania and „Organaria" in Spain, to an edition dedicated exclusively to Romanian music in Spain and the Spanish one in Romania. As a small start-up we are looking to join research groups that are preparing to submit a proposal for the call but we are more interested in [ENV.2013.6.4-1 Assessing individual exposure to environmental stressors and predicting health outcomes](#).

Mapping Italian research interests in the last Health call

APRE, together with experienced Italian health Research teams, has put together a list of specific interests on the next health call 2013. In some cases, Italian researchers are expressing an interest to coordinate and in others, to be partners. The "mapping" is meant to encourage the networking among the research groups in view of this last call.

Looking for partners for the FP7 2013-ENERGY.2013.2.4.1: Exploration and assessment of geothermal reservoirs

Slovak Innovation and Energy Agency (SIEA) is an advisory center for the rationalization in the use of energy, trainings for energy experts or consultations about the efficient use of energy. It makes an important contribution in the achievement of government energy policy objectives, principally by promoting energy efficiency, new technologies and RES. The agency follows the development of energy efficiency in Slovakia, acts to reduce the energy consumption and to eliminate adverse impact of energy generation, transmission, distribution and consumption on the environment.

We are looking for companies that are interested in acquiring partners for European projects on the field of “Exploration and assessment of geothermal reservoirs”.

Contact: Eduard Jambor at the mail: eduard.jambor@siea.gov.sk ; www.siea.sk

Partner Search from Fraunhofer Portugal Research Center for Assistive Information & Communication Solutions

Topics of interest, but not limited to: AAL-Ambient Assisted Living, Information & Communication Technologies for Development: AAT.2013.2-1. Airports, AAT.2013.3-1. Human factors, SST.2013.3-1. Managing integrated multimodal urban transport network, SST.2013.3-2. Implementing innovative & green urban transport solutions in EU & beyond, SST.2013.3-3. Capitalising CIVITAS knowledge & experience, SST.2013.4-3. Biomechanics & advanced digital human body models, testing for vehicle safety.

Looking for partners for the FP7 2013 - ENV.2013.6.1-1 Climate-related ocean processes and combined impacts of multiple stressors on the marine environment

The Institute of Water and Environmental Engineering, IIAMA, of the Technical University of Valencia (Universidad Politécnica de Valencia, UPV), was created in 2001, as a new framework to better host and bust the research activities maintained by different groups within the University for more than two decades. It has the goal of promoting scientific research, specialized teaching and technical advising. It is currently integrated by nine Research Areas that focus on different water related fields, considering water both, as resource, and as a biosphere support. The Institute has a wide experience in technology transfer and cooperation with private companies and governmental agencies.

We are looking for companies that are interested in acquiring partners for EU projects on the field of "Climate-related ocean processes, combined impacts of multiple stressors on the marine environment".

Contact: Carlos A. García Meseguer at the mail: gestor@iiama.upv.es , www.iiama.upv.es

Looking for partners for the FP7 2013-ENV.2013.6.1-4 Land cover & land-use change & climate change mitigation

Agresta is an environmental company (SME), established in 2000, specializing in forestry, natural resources management and the applications of new technologies to the environment. Our main research areas are: Carbon consultancy, Forest Management, LiDAR technology applied to forest, Geographic Information System & GP, Land planning, Natural Environment Engineering, Use of forest resources-energy (forest biomass), Environmental impacts, Forest Property. Agresta is a multidisciplinary team of over 30 professionals, graduates in: Forestry engineering, surveying engineering, Biology, Statistics, Geography, Economics, Environmental sciences, Technical management and organization of natural resources. In the last years Agresta has participated in a Project Design Document (PDD) for one Afforestation and Reforestation Clean Development Mechanism (A/R CDM) in Senegal.

We are looking for companies that are interested in acquiring partners for European projects on the field of "Land cover and land-use change and climate change mitigation".

Contact: María Jesús Toledo Pablo Ascasibar, mjtoledo@agresta.org ; www.agresta.org

Looking for partners for the FP7 2013 - ENV.2013.6.1-2 Atmospheric processes, eco-systems and climate change

Ramem is a Spanish SME. Ramem's main R&D activities focus on the development of analytical instrumentation called Differential Mobility Analyser (DMA). DMA analyses, classifies molecules considering their ionic mobilities, related with size, shape. The main potentialities of the technique arise from applications where the size of the molecule is an important magnitude, some examples could be: size control of nano-particles production, atmospheric study of aerosols, especially in the nucleation stages. Other important characteristic is the possibility of distinguishing isomers, when they present different mobilities, which are indistinguishable using the most popular techniques of Mass Spectrometry. Any analysis considering atmospheric pollutants of water contaminants may take place using DMA.

We are looking for companies that are interested in acquiring partners for EU projects on the field of "Atmospheric processes, eco-systems, climate change".

Contact: Silvia López Vidal at the mail: slopez@ioner.net ; www.ioner.eu

Looking for partners for the FP7 2013 - ENV.2013.6.2-4 Sustainable Landcare in Europe.

We are a SME specialise in Remote Sensing apply to Water Resources Management. We have a strong experience at national/international level; we had been involved in 16 EU projects. We offer the a solid technological partner as well as important users at national level like River Basin Authorities, User Water Communities, etc. We are looking for companies that are interested in acquiring partners for EU projects on the field of "Sustainable Landcare in EU".

Contact: Lara Fernández at the mail: lfernandez@geodim.es ; www.geosys.es

Looking for partners for a Project under the call EAC/S01/2012 - Pilot project for the development of sector skills alliances. Training in Energy efficiency and sustainable building

We are Montenegrin employers Federation. MEF Mission: development of social dialogue, representation, protection of interests of employers/entrepreneurs in relation with Trade Union, Government, other governing authorities.

The main objective - establishment of strong, independent and unique institution of employers and entrepreneurs. MEF is an umbrella and representative organization gathering employers and entrepreneurs whose membership consists of SME, associations and big economic systems. MEF members realize over 85% of GDP and employ over 65% workers.

Looking for partners for the FP7 2013 - ENV.2013.6.5-2 Mobilizing environmental knowledge for policy & society

If your project will encompass the marine environment, then we would be very interested to be considered as a partner. The public & governmental perceptions of the use/impacts on the marine environment are very varied, this project could address this issue in a WP.

Contact: sah@aquabt.com

Looking for partners, projects related to the field of: institutionalization of civil society; public service delivery by public agencies, NGOs... democracy/citizenship

I am looking for partners and projects related to the field of: institutionalization of civil society; public service delivery by public agencies and nonprofit organizations; democracy and public participation.

Contact: Wojciech Kaczmarczyk, Warsaw/Kielce, tel. 0048600437855, wojteklk@poczta.fm

Looking for partners for the European Commission Programme «Industrial Relations & Social Dialogue» 2012 (II. Improving expertise in the field of industrial relations)

We are looking for partners to join a project in regards with the enhancement of industrial relations of the countries-members. Project Title: "Flexicurity practices analysis/implementation for the advancement of Industrial Relations". The project aims at identifying the best practices in the field of flexibility, mobility in the workplace. The effects of the practices of flexicurity in member states to industrial relations, employment, the economy will be examined. The implementation of flexicurity will be closely scrutinized, obstacles in the process identified along with measures for overcoming those.

The project's aims will be realized through the analysis of the issue in question with studies as well as a series of informational seminars, conferences, workshops which will exploit, disseminate the results of the studies. Actions within this measure will involve Social partners, organizations linked to industrial relations (NGOs, centres/institutes, universities), public authorities (Chambers). Programme deadline: 04/09/2012

Contact: Kostas Theodoridis, theodtyr@gmail.com

Partner Search: We are coordinating an FP7 security call; Smart & protective clothing for law enforcement, first Responders (SEC-2013.1.4-1)

We are looking for four groups of partners;

1. Textile researchers/Institutes; Send a description of your expertise for the project/previous funding in the area.
2. SME who manufacture and/or design PPE (helmets, PPE (ideally seamless).
3. SME in sensors (measuring GSR, communication/positioning expertise) interested in working with academic partners.
4. Organisations or representation for First Responder or law enforcements.

Contact: Hugh Hayden, hugh.hayden@ucd.ie

Partnering Offer from Passive House Platform, Belgium

Expertise offer: Research activities of PHP include: collecting information, analyzing, disseminating frontrunners of newbuilt/retrofit construction and building technology projects with very high factor of energy reduction, use of renewable technologies; collaboration with SMEs towards market introduction/market growth of passive house building technology / products; collaboration with local/regional actors/municipalities in stimulating/transferring know-how.

Former participation in International projects: <http://www.passiefhuisplatform.be/research-php>

Relevant topic in Work Programme: ENERGY.2013.8.8.1: Demonstration of optimised energy systems for high performance-energy districts (Smart cities and communities)

Call For Tender / Proposals / Applications / Fundings / Awards

CONCERT- Japan Funding Pilot Joint Call on Research & Innovation

In the Frame of the CONCERT-Japan project a **Pilot Joint Call** for research project will be launched on 3rd September with deadline 15th November on the following topic:

- **Efficient Energy Storage and Distribution**
- **Resilience against Disasters**

The CONCERT-Japan project is an international ERA-NET initiative under the EU FP7, with the objective of coordinating and en-hancing the science, technology & innovation (STI) cooperation between the European countries and Japan.

In the frame of the CONCERT-Japan Pilot Joint Call, research projects with an innovative dimension will be funded for a period of 2 years in the above mentioned themes. The research projects are expected to have **mobility and networking** dimensions apart from the core **research** component. Each project consortium applying for this call should consist of at least 3 partners, 1 from Japan and 2 from two different Euro-pean countries participating in the call.

The call will be funded by the budget allocated by each partici-pating national/regional funding organization. Therefore, each participating funding organization reserves the right to apply its national/regional funding regulations.

More... <http://www.concertjapan.eu/> ; <http://www.concertjapan.eu/node/188> ; anna.boitard@cnrs-dir.fr ;

CONCERT - Conference and Partnering Events - Pilot Joint Call

In order to provide detailed information on the call and to allow to the interested science and innovation community for networking and exchange of project ideas a two-days event will take place. Researchers interested in presenting their project idea in the plenary session of Tokio or Milan are invited to apply by filling in the application form.

The project may **cover the travel expenses** of a limited number of eligible applicants which are eligible for funding under the rules/regulations of the funding organisations. Two Conference & Partnering Events are organized:

-Resilience against Disaster, Tokio, 10-11 Sept 2012, <http://www.concertjapan.eu/node/190>, y3sakura@jst.go.jp

-Efficient Energy Storage & Distribution, Milano, 27-28 Sept 2012, <http://www.concertjapan.eu/node/189>, savini@cestec.it

EU-Japan collaborative R&D through FP7: Calls for proposals for 2013 and matching funds in Japan

Commission launches innovation partnership for Smart Cities and Communities

By launching a Smart Cities and Communities European Innovation Partnership (SCC), the European Commission aims to boost the development of smart technologies in cities. The objective is to pool research resources from energy, transport and Information and Communication Technologies (ICT) and concentrating them on a small number of demonstration projects which will be implemented in partnership with cities. For 2013 alone, € 365 million in EU funds have been earmarked for the demonstration of these types of urban technology solutions.

This initiative will contribute to the wider EU urban agenda, at the core of the future cohesion policy after 2013.

Call for proposals for Sustainable surface transport (SST)

The EC has published its Sustainable surface transport call for proposals, which also includes the 'European Green Cars Initiative'. The document is part of the latest set of calls published under the EU's Seventh Framework Programme (FP7). The call aims to support innovation, sustainable growth, decongestion, competitiveness, safety across the entire surface transport system. It encompasses topics such as the creation of zero emission ships, railway infrastructure optimisation, integrated multimodal urban transport network, biomechanics, next generation electric motors, technology transfer.

OICT's Mission Donation Programme (MDP)

Since 1998, the Office of Information and Communications Technology (OICT) has been operating a unique programme called the Mission Donation Programme (MDP) for the benefit of United Nations Permanent Missions and NGOs.

The Mission Donation Programme allows UN Permanent Missions and NGOs to request recycled computer equipment for their use, thus supporting a greener ICT operation for the United Nations Secretariat. Since the programme's establishment, more than 10,348 devices have been donated to over 122 countries and NGO's.

Baltic Dynamics Conference, 13-15 September 2012, Vilnius, Lithuania

The Baltic Dynamics Conference is organised Baltic countries initiative aiming at a promotion of international co-operation in the fields of innovation, SMEs support, technology transfer. It attracts participants from a broad range of countries. It promotes exchange of experience/adds to the successful development of innovation/economy.

The Conference will aim at promotion of innovativeness among policy makers, business, science, education and society. Submissions from academics, policy makers, consultants, managers in innovation management, technology transfer as well as in SMEs support field are strongly encouraged and should focus on the following topics:

The role of Non-Governmental Organizations in Technology Development
From Research to Market - International Cooperation

Public entrepreneurial support
Innovation and Knowledge Transfer

9th Conference Instruments for Shaping a Knowledge Region – Interregional & International Collaboration in Science Based Regional Development, Leuven & Genk, Belgium. 17-19 September 2012

Leuven is one of the most prominent examples of successful knowledge based regional development in the world. Intensive collaboration between the local government, KU Leuven, the business community has resulted in a thriving innovative economy. Not far from Leuven lies Genk, home to the 3rd largest industrial region of Belgium, currently in the process of transforming its manufacturing based economy into a knowledge driven economy.

This year's conference venue is C-mine, located at the former mine site of Winterslag in Genk. The program includes a Grand [Innovation Tour in Leuven](#), a [Social Program in Genk](#), a debate between mayors, entrepreneurs in Leuven, a 2-day inspirational program with over 30 speakers from all over the world.

World Urban Forum, UN Habitat, The Urban Future, Naples, Italy, 1-7 September 2012

The World Urban Forum was established by the United Nations to examine one of the most pressing problems facing the world today: rapid urbanization, its impact on communities, cities, economies, climate change, policies. Save the date to share, learn, discuss the future of our cities. The World Urban Forum is the largest, most important UN meeting on cities.

Thousands of people drawn from the public/private sectors, academia, civil society, the media will meet in Italy in 2012. Equity, economy, ecology of cities will be the focus of the Forum. Urban job creation, livable cities, quality of life, culture, urban planning, the environment, urban mobility, energy will be the main topics as we reflect on the prosperity of cities.

The road to Naples starts with a series of 6 online debates about The Urban Future to garner new ideas, to enhance the dialogue sessions.

Conference Towards competitive and resource efficient urban mobility, Brussels, 17 September 2012

The conference will mark the launch of the public consultation on the EU's urban mobility activities in the context of the White Paper "Roadmap to a Single EU Transport Area - Towards a competitive & resource efficient transport system".

The event is aimed at institutional stakeholders, local governments, transport users, operators, as well as industry, research representatives. The conference will also take stock of the accomplishments of the CIVITAS Initiative. Launched in 2002, CIVITAS celebrates its 10th anniversary of supporting cities in implementing ambitious transport measures, policies towards sustainable urban mobility.

Three parallel green-energy events in South East Europe, 29-31 May 2013, Sofia, Bulgaria

[SEE Solar – South-East European Solar PV & Thermal Exhibition](#)

A new report from the European Photovoltaic Industry Association (EPIA) has pointed out that solar photovoltaic (PV) electricity continued its remarkable growth trend in 2011. The solar market in South-East Europe is still small, but it is growing rapidly, has great potential to become a considerable part of the global renewables market.

Two other events are being conducted in parallel:

[9th South-East European Congress & Exhibition on Energy Efficiency and Renewable Energy](#)

[4th South-East European Conference & Exhibition "Save the PLANET" - Waste Management, Recycling, Environment](#)

Sustainable Urban Mobility Plans - Technical Training Seminar, 18 September 2012, Helsinki, Finland

A Sustainable Urban Mobility Plan is a way of tackling transport-related problems in urban areas more efficiently. Building on existing practices and regulatory frameworks in the Member States, its basic characteristics are:

- A participatory approach;
- A pledge for sustainability;
- An integrated approach;
- A clear vision,
- Objectives and measurable targets;
- A review of transport costs and benefits.

The technical training seminar is targeted at local planners, implementers in Finland. It is organised by the European Eltisplus project and the Union of the Baltic Cities - Environment and Sustainable Development Secretariat in Turku. The event will be organised in cooperation with the Ministry of Environment, the Ministry of Transport & Communication.

IMP³rove Training: Introduction to Innovation Management, Paris, August 30-31, 2012

Innovation Management becomes ever more important in your service offerings. You would like to further develop your knowledge in all dimensions of Innovation Management. In the course offered by the IMP³rove - European Innovation Management Academy you will learn how you can help your clients to create business impact by addressing all areas from innovation strategy to innovation organisation and culture and innovation processes.

Objectives: Leveraging the IMP³rove Assessment Reports for effective Innovation Management consulting; Applying basic consulting tools for effective recommendations for improving the Innovation Management performance at SMEs.

Target groups: Cluster managers, intermediaries supporting SMEs in developing their innovation management capabilities, Innovation Management consultants at the beginning of their career.

You will find a comprehensive overview on the upcoming IMP³rove training offerings here: <https://www.improve-innovation.eu/academy/education-programme/training-calendar/> general information at www.improve-innovation.eu

Unitat d'Innovació of ParcBIT & IMP³rove jointly invite you the training "Introduction to the IMP³rove Approach", 24-25 September 2012, Mallorca

Unitat d'Innovació of ParcBIT - PARC BALEAR D'INNOVACIÓ TECNOLÒGICA and member of the Enterprise Europe Network joined forces with the IMP³rove – European Innovation Management Academy to organize the training "Introduction to the IMP³rove Approach" at the site of ParcBIT in Mallorca.

This training offers you the opportunity to learn more about the EU approach to innovation management assessment as a starting point to effectively support your clients - SMEs - in re-gaining competitiveness. At the same time you have the chance to learn about ParcBIT in Palma de Mallorca, the diversity of enterprises located there.

Consultants, intermediaries, financial investors active in supporting SMEs are invited to attend the training. Due to the international participants, the training will be held in English language.

For registration for the IMP³rove trainings please send an email to: improvecoreteam@atkearney.com.

Introduction to GIS, 10-11 September 2012, Newcastle University, UK

Geographic Information Systems have become key in most corporate scenarios – 80% of all data now has a spatial element. Reap potential rewards in your business by learning about the power of GIS. This action packed two day course is structured to maximise your knowledge of GIS. Starting at the very basics, you will be taken through the key elements of a GIS and leave with the ability to independently tackle real world spatial problems within your corporate environment.

Audience: For those who have little or no experience or knowledge of Geographic Information Systems, who are looking for an accessible introduction to computer mapping which covers the main aspects of GIS. This intensive, fast paced course will run through all the basics of a GIS system.

Postdoc, Department of Computer Science, University of Oxford, Deadline 31 August 2012

The Department of Computer Science of University of Oxford, has several vacancies for postdoctoral research assistants to work in the area of logic based knowledge representation, reasoning, under the direction of Professor Ian Horrocks Dr. Bernardo Grau. The posts are funded by the UK Engineering & Physical Sciences Research Council-EP SRC, the EU FP7. The posts are available from late summer/autumn 2012, and will be of between two and four years duration.

The successful applicant will join an internationally leading,/growing research group, with research interests ranging from the logical foundations of information systems through to their implementation and deployment in large scale applications.

Postdoc, Computational Biology, UC Merced

A post-doc position is available at the University of California at Merced on the NSF funded project "New Tools for Characterizing Protein Dynamics" The goal is to develop computational tools for analyzing molecular dynamics (MD) simulations of proteins, particular of disordered proteins that never fold into a fixed structure but are thought to perform their biological function through their dynamics. Experimental observation of the proteins is limited so computer simulation through MD, other techniques plays a key role. The challenge is in analyzing the amounts of data that result from the simulations. The candidate will work on applying / adapting machine learning/other knowledge discovery techniques in computer science to analyze the output of the simulations.
