Technology Transfer and Innovation

Events in technology transfer and innovation field

The events provide you the opportunity to meet potential cooperation partners during pre-arranged face-to-face meetings, to present your business or technology offers. Do you want to participate at some events? Do you have technology profiles in the fields? Please contact office@ipacv.ro to support you.

December 2009

- 01 [Company mission on the olive industry](#) Sevilla (Spain)
- 02 [Addressing the Innovations and Challenges for a Digital Britain](#) London (United Kingdom)
- 03 [International Brokerage Event "Precision Fair 09"](#) Veldhoven (Netherlands)
- 03 [Cooperation event "MoldMatch" 2009](#) Frankfurt Main (Germany)
- 03 [POLLUTEC Horizons 2009 matchmaking event](#) Paris (France)
- 03 [Drug Development](#) Würzburg (Germany)
- 07 [Technologies and Innovation in the fresh and processed Fruit and Vegetable industry](#) Avignon (France)

January 2010

- 12 [Plant International Meeting](#) Angers (France)
- 20 [InnoBuildTech at BUDMA 2010 Fair](#) Poznan (Poland)
- 21 [CHEMIKA 2010](#) Szczecin (Poland)
- 28 [Technology Matchmaking Event during The Licensing Executives Society Winter Meeting](#) Istanbul (Turkey)

February 2010

- 02 [LEARNTEC Meetingpoint 2010](#) Karlsruhe (Germany)
- 03 [Fruit Logistica 2010](#) Berlin (Germany)
- 05 [Envietech 2010 Business Lounge](#) Vienna (Austria)
- 10 [Ceramica INNOVA: II Technology-Business Brokerage Event](#) Valencia (Spain)
- 15 [Mobile World Congress Brokerage Event 2010](#) Barcelona (Spain)

March 2010

- 03 [International Brokerage Event of Renewable Energy ENEX 2010](#) Kielce (Poland)
- 10 [Oceanology International 2010 Brokerage Event](#) London (United Kingdom)

April 2010

- 09 [International Brokerage Event "Tourism 2010"](#) Kielce (Poland)
- 21 ["Organic Days" : European Partnering Event on Organic Preservation](#), Valence (France)

July 2010

- 05 [ESOF 2010: partnering event](#) Torino (Italy)

October 2010

- 28 [Matchmaking at Aachen Membrane Kolloquium AMK 2010](#) Aachen (Germany)

InterCluster'09 3-4 December 2009, Brussels

In addition to the **plenary speeches**, attend the **Toolbox sessions**, the collective brainstorming "**World-Café**" sessions and the "**speed-presentations**" of a selection of 30 European clusters.

More... www.intercluster.eu

1st INTERREG Capitalisation Conference, Gothenburg, Sweden, on 9-10 December 2009

A dedicated website has been set up to provide information, registration and accommodation details. Participants interested in applying can **propose their project idea** to be displayed during the conference.

More... www.interreg4c2009.eu

Innovation Day, Erfurt, 8 December 2009, during Erfurt Fair (Messe Erfurt)

The Your Europe — Business team will give a presentation on the portal before the workshop on EU funding programmes and will be present with a stand in the exhibition.

More... <http://www.innovationstag-thueringen.de/> ; http://www.messe-erfurt.com/service_anreise.html for the venue.

Technology transfer services / All reasonable models of co-operation will be considered

You are an inventor, do you have technology to transfer, do you have new products, technology based on innovations to offer; do you need new technologies, do you need technical assistance in technology transfer...

Please contact IPA CIFATT Craiova, e_mail: office@ipacv.ro ; web site: www.ipacv.ro.

SMEs

European Commission publishes eBusiness Guide for SMEs

The eBusiness Guide is an intelligent online tool that helps enterprises to selfdiagnose their eBusiness competences, ICT needs, proposes a range of suitable solutions, as well as local ICT service providers that can offer information, advice.

More... [Read the article](#)

Technology offer:

Self-generating mobile phone charger operating in extreme climatic conditions

A Bulgarian independent researcher developed and produced a mobile phone charger able to self-generate energy for mobile phone batteries in emergency situations with electricity cut offs and extreme climatic conditions. The researcher seeks manufacturing and/or commercial agreement with interested organisation in EU.

Implantable optical system for cornea

A Spanish Basque Technological Centre has developed an implantable optical system based on tissue engineering which promotes integration into the patient's ocular tissue in a stabilised environment based on a drug delivery system. A license agreement is sought.

Cost-effective way for recombinant proteins manufacturing at industrial level

A Spanish biotechnological company offers its proprietary technology to develop and manufacture specific recombinant proteins at industrial level. Based on BEVS (Baculovirus Expression Vector System), the company uses insect larvae as minibioreactors gathering the best features of BEVS and overcoming the scalability issues.

Software for Management Systems

A Spanish SME has developed an innovative application to help entities to meet and keep the requirements of ISO (International Standards Organisation) standards and the EFQM (European Foundation for Quality Management) model. This tool has been designed to implement, maintain and improve Quality, Environmental, Occupational Health or Safety Systems among others.

Telemetry system for photovoltaic solar plants

A Spanish engineering company specialised in industrial applications of information technologies has developed a telemetry system for photovoltaic solar plants. It provides critical information regarding the facilities via computer or

mobile phone and it also generates production reports, charts, comparisons between plants, despatch of alerts, etc.

Technology request:

State-of-art technology for non- galvanization method of point chrome plating of large elements.

The company from south-east Poland specialized in production and repairs of hydraulic actuators, stuffing is looking for state-of-art technology for non- galvanization method of point chrome plating of large elements. Implementing this technology into production should allow company for time saving and also improve quality of the work itself.

Modern technology for measuring diameter of cylinder

The company from south-east Poland is specialized in production and repairs of hydraulic actuator, stuffing. Company is looking for state-of-art technology for measuring of diameter in hydraulic cylinders.

Modern technology for cars and lorries painting.

The company based in south-east Poland cooperates with car repairs and car painting firms. To expand its range and quality of services, the company is looking for modern car paint technology.

Further applications sought for transportation sales, customer maintenance & management sales system SaaS application for the Freight, Transport, Logistics industry

An Israeli SME has developed an innovative, first of its kind product dedicated to the transportation, logistics and supply chain management industries, including a full CRM for sales force automation and various elements of pricing (including high level optimizations based on historical and forecasted data). A partner based in a strategic logistics market, with vast experience in JAVA, DB2, Business Intelligence and WEB Services is sought for further joint development of the system.

Field of technology in research and development for mobile and wireless

A French company is looking for a partner (Developer, R & D for Mobile Content and Game) for: 1. Applications for mobile phones and games 2.

Business Offers

GR150233-07

A Greek jewellery workshop based on the inspiration and craftsmanship of its founder, Mrs. Antigoni Kapoutzi. The workshop began in 1990 whereas in 2001 a new model studio and workshop was founded. The company is already established in Greece, especially

DE150202-01

A German direct seller who is specialised in buying and selling of new and used machines, packagings and raw materials for the food industry is looking for contacts and co-operation partners in Europe to offer its trade intermediary services.

RU000003-03

Russian individual entrepreneur active in non-standard and special web-programming offers subcontracting/outsourcing activity.

GR150233-07

A Greek company involved in the trade of industrial filters, lubricants, batteries, etc. They are interested in either promoting Greek products abroad or expanding their line of products to include new suppliers.

FR150403-01

A French company specialized in software dedicated to the banking industry is looking for Trade Intermediary and/or Subcontracting partners

Russian company: A system for monitoring people and cargo transportations via the global positioning system

Using the signals from the space navigation equipment, the system transmits the object location data as SMS to the specified telephone numbers with the specified periodicity.

More... Olga Tarasova, +7 48439 68492, o.tarasova@rttn.ru

Russian company: Technology for manufacturing cross-country chassis for passenger vehicles

The chassis can replace standard wheels in order to make the vehicle go in snow, bogs or operate as a mini-tractor. The chassis comprise a frame with on-board reducers and wheels of large diameter with low pressure tires. The chassis can be used for any vehicle without assistance of car repair professionals.

More... Olga Tarasova, +7 48439 68492, o.tarasova@rttn.ru

Greek company: Surgery Planning Software for Total Hip Replacement

The software provides a standardised process that enables doctors to make an initial selection of suitable implants, minimizing time and optimising results. It performs visualisation of Computed Tomography (CT) scan data, implant selection and fitting analysis.

More... Vassilis Argyroulis, +30 210 3607690, argyroulis@help-forward.gr

Greek company: Structural Design Software

Structural engineering software application for static and dynamic analysis and design of reinforced concrete buildings, a product combining high functionality and particularly high speed in calculating.

More... Vassilis Argyroulis, +30 210 3607690, argyroulis@help-forward.gr

Italy company: New mobile system on forced air cooling and fruit ripening controlled process

The machine is composed of a unit endowed with a fan and an integrated tarp. An electronic instrument (PLC-

programmable logic controller) is placed on board or remote panel, double probes are inserted in the pulp fruit. The power fan pulls the cold air from the cold room crossing the product and allowing to get the pre-cooled in 1/3 of the time employed for the normal process.

More... Francesco Cappello, +39 095 535606, fcappello@mediainnovation.it

Business Requests

Belgian company specialised in producing and distributing additives, flavours, spices to the traditional and organic meat industry in Belgium, Romania, Luxembourg and the Netherlands is looking to be the exclusive distributor for these countries for an international producer of spice blends to the meat industry.

More... een@vlao.be

Belgian company specialised in energy services is looking for a co-operation with an EU manufacturer/importer of sunpower systems. Different types of co-operation are possible. The Belgian company can act as a trade intermediary, a franchisee or a subcontractor.

More... een@vlao.be

Belgian company specialized in PE plastics rotation moulding and currently active in water tanks, (waste) water treatment and diesel tanks, is looking for following co-operation: 1. is looking for commercial partners/distributors in specific countries 2. offers trade intermediary services for waste water treatment technologies 3. is offering its subcontracting activities in rotation moulding.

More... een@vlao.be

ID 332 - Greek company specialized in production of calcium carbonate fillers, limestone and gypsum finishing plasters, concrete and mortar improvement resins, repair and insulation mortars is seeking partners offering trade intermediary services.

ID 333 - Greek company specialized in prefabricated timber trusses and their assembly is seeking European companies offering trade intermediary services. The Greek company also offers its services as a subcontractor.

ID 336 - Greek company specialized in manufacturing plastic mobile containers, as well as a large variety of other plastic products, is offering & seeking trade intermediary services. The company is also interested in reciprocal production.

ID 338 - Greek company specialized in manufacture of metallic rollers and other parts for conveyor belts is offering trade intermediary services and is also interested in reciprocal production with partners from Europe and Africa. In addition, the Greek company is also searching for a partner from Europe and / or Africa offering trade intermediary services.

Research

New website for open access pilot initiative

Launched in August 2008, the Open Access Pilot requires certain FP7 beneficiaries to deposit peer-reviewed research articles or final manuscripts resulting from their projects in an online repository.

The pilot covers the following themes under the FP7 Co-operation Programme: Energy; Environment; Health; ICT; and Socio-economic Sciences and Humanities. It also extends to the Science in Society and Research Infrastructures programmes under the Capacities. In budgetary terms the pilot covers around twenty per cent of the FP7 annual budget. Within the pilot, beneficiaries are required to make their best effort to ensure that this electronic copy becomes freely and electronically available to anyone within certain limits.

The EC has now published an updated version of its Open Access website, which contains copies of the Model Letters to request amendment to publishing agreement and copies of a model amendment to publishing agreement. The EC also operates a helpdesk dedicated to the open access pilot and this is linked from the new website. Anyone involved in the pilot initiative is encouraged to refer to the new website.

Partner Search from Alsace BioValley (Europe's cluster for life sciences)

Call title: Regions of Knowledge, Call identifier: FP7-REGIONS-2010-1, Proposal objectives: to develop Transnational cooperation between regional research-driven clusters in the following field : "From translational research to personalized medicine". Proposal coordinator: BioValley <http://www.alsace-biovalley.com/>

Contact: agnes.legoll@alsace-biovalley.com

Genomica: Partner search for a project proposal from the University of Almería, Spain for a project proposal on research about health (structured lipids) under the Spanish National Plan for R+D+I

Structured lipids (SL) may offer efficient means of delivering target fatty acids (FAs) for nutritive or therapeutic purposes. Specialty lipids include a wide range of products amongst which SL are a main class. SLs are triacylglycerols (TAG) in

which FAs are placed in specific locations in the glycerol backbone, produced using a chemical/enzymatic process. Much attention is being paid to SL due to their potential biological functions and nutritional perspectives. Lipids can be restructured to meet essential FAs (EFAs) requirements or to incorporate specific FAs of interest. SL may offer the most efficient means of delivering target FAs.

FP7 Space call - Partner search form from Lithuania

Activity 9.2 Strengthening the foundations of Space science and technology; Area 9.2.1: Research to support space science and exploration; SPA.2010.2.1-04 Space transportation for space exploration (C) In-flight navigation and control High speed Coordinate transformation algorithms for any flight and navigation aims including gyroscopes, rotation wheels, precession, nutation.

Main goal of proposal: implementation of newer algorithms with shorter scripts will reduce time of any calculations and will save an energy consumed by CPU's (very valuable in outer space). The proposal is based on a new algorithms invented by the teamwork of Arcus Novus Ltd. in cooperation with Institute of Mathematics and Informatics (Lithuania), with support of Faculty of Rocket, Space Technology at Bauman Moscow State Technical University.

ArcusNovus Ltd. has great portfolio, skills in FPGA programming (VHDL), simulations of ASIC for High speed Coordinate transformation of In-Flight objects. Hereinabove described tasks, skills are presented in the first common ESA-EDA-EC list of Critical Technologies for European Strategic Non-Dependence for usage in 2009. The invention consists on a newly recalculated space navigation algorithms and it saves the time of calculation of each type of navigation formulas.

Contact:: Joint Stock Company "ArcusNovus" Ltd. vto@arcusnovus.com;

Partner search request from a German company

They are looking for consortia preparing for SPA.2010.2.2-01 Space technologies, „Miniaturization of two-phase thermal control technology for space application“, „Enhancement, extension of two-phase thermal control technology for space application“.

Call For Tender / Proposals / Applications / Fundings / Awards

Call for proposals under the Marie Curie Cofund

The European Commission's Directorate-General for Research is calling for proposals under the Marie Curie Cofund ('Co-funding of regional, national and international programmes') scheme.

The Cofund scheme offers additional funding to existing or new regional and national fellowship programmes for research training and career development in order to encourage researcher' movement across borders. Applicants should be public or private bodies that are responsible for funding and managing fellowships or research training programmes.

These can be ministries, research academies, agencies, international organisations or other bodies with a public mission. All fields of research, research training, except research areas covered by the EURATOM Treaty, are eligible, provided that there is an element of cross-border mobility.

More... <http://cordis.europa.eu/fp7/calls/>

Genomica: The EC has launched a new healthy eating campaign for children.

This campaign is part of the EC activities aimed at addressing the growing problem of overweight children in Europe. The campaign will give children across Europe a chance to take part in on-the-spot activities and interactive games promoting a more balanced diet and healthier eating habits.

A number of projects on children nutrition have been funded through the Food, Agriculture, Fisheries & Biotechnology part of FP7. These include projects on fruit and vegetable consumption and the impact of food contaminants in perinatal nutrition on obesity development. Several projects on children's obesity are also funded under the Health Programme. An estimated 22 million children in the EU are overweight, with than 5 million of these are obese and this figure is expected to rise by 400,000 every year. Since 2007, already more than €17.6 million have been specifically dedicated to this issue.

More... <http://europa.eu/rapid>

HEAL Work programme

HEAL's focus is on advocating for the needs of the most vulnerable to be considered in EU policy formulation and implementation. Our strategy is to provide expert input and a health perspective into environmental policies, and build coordinated efforts with vulnerable and health-affected groups, such as youth organisations and patients with asthma, cancer and Parkinson's disease, and with health professionals, who represent highly-respected voices in EU debates.

Policy

European Business Test Panel website!

The European Business Test Panel (EBTP) is a unique tool allowing the EC to obtain direct feedback from businesses on Commission legislative proposals or initiatives likely to have an impact on businesses. The EBTP is composed of around 3.600 companies of different sizes and sectors located in all EU Member States. Companies selected as EBTP members reply to online questionnaires sent to them by the EC on a regular basis.

The EBTP aims at being fully representative and focuses on consulting businesses throughout Europe. It is entirely Internet based, using the on-line consultation tools developed under the Interactive Policy Making (IPM) initiative. This survey mechanism allows the consultation process to be fast, efficient, the results of consultations can be made available to both participants, policy makers more quickly.

Events

19th International Conference on Electrical Machines, ICEM, Rome, Italy, September 6-8 2010

International Conference on Electrical Machines, has established itself as an influential and recognised international event and is the only major conference entirely devoted to electrical machines where the community of specialists discusses the progress achieved and the future developments in technologies, analysis, design, testing, operations, practical applications, maintenance and teaching in the field of electrical machines.

More... <http://www.icem2010.it>

1st International Conference on Universal Technology, 19-20 May 2010, Oslo University College, Norway

The conference addresses all issues related to universal access, including universal design of computing systems, the evaluation of such systems, guidelines, legislature, training programmes, research results and overall best practices and experiences. Paper deadline: 15 January 2010.

More... <http://www.iu.hio.no/~frodes/unitech10/cfp.html>

14th IEEE International Symposium on Power Line Communications & Applications, 28-31 March 2010, Rio de Janeiro, Brazil

The Symposium focuses on research, application, commercialization aspects of the power line communication technology, in both broadband and narrowband fields. Prospective authors are cordially invited to submit contributions describing completed or ongoing research related to the power line communication area.

IEEE Region 8 Conference, MELECON 2010, 26-28 April 2010, Valletta, Malta

MELECON 2010 is a major international forum presenting design methodologies, techniques and experimental results in emerging electro-technologies. MELECON is one of the flagship conferences of the IEEE Region 8 with participants from all over the world. The purpose of this conference is serve as catalyst for the technical exchange between researchers and practitioners from different technological fields including Control Systems, Communication and Information Technology, Mechatronics, Nano - & Micro-Electronics, Electrical Power Systems, and Signal & Image Processing.

2010 calls for the International PhD & Postdoctoral Programmes at the Spanish National Cancer Research Centre

The CNIO offers excellent training, research opportunities in cutting edge basic, applied cancer research. The programmes are open to outstanding young graduates who want to pursue ambitious R&D projects

The CNIO International Postdoctoral Programme offers up to 6 very competitively funded two-year postdoc positions to outstanding junior scientists. Applications are considered at regular intervals, this call closes on December 31st, 2009.

The CNIO International PhD Programme each year supports 10 candidates for a 4-year PhD. We have one selection per year. The deadline for applications is March 15th, 2010.
